

Virtual fundraising:

How to host an online quiz

children's
air ambulance

keeping hope alive

£5 could pay for 300L oxygen to help critically ill children breathe.

Hosting an online quiz is a great way to have fun, stay connected with friends and family and raise money for the Children's Air Ambulance.

From the comfort of your own home host your quiz online and charge participants an entry fee. The winning team will be able to hold their head up high knowing that they've won while raising money to support our lifesaving service.

- 1 Choose a date**
Work out a day that is best for you to have as many family and friends involved - the more the merrier in recreating that classic pub quiz atmosphere. Allow 1-2 hours for the questions and any breaks so your participants can make sure they're topped up with refreshments!
- 2 Set up a JustGiving page**
JustGiving allows people to donate their entry fee without using cash. They can pay securely online knowing that their donation will be going directly towards supporting our lifesaving services.
- 3 Decide which platform you're going to use to host your quiz**
There are a number of free online platforms out there for you to choose from - Facebook Messenger, Google Hangouts and YouTube Live to name a few. If you choose to livestream via YouTube Live or Twitch you can integrate your livestream video straight onto your JustGiving page, which is a great way to remind your teams that you're fundraising and may also prompt some extra donations.
- 4 Invite your friends and family**
Once you've decided on the platform that works best for you, send an invite to your friends, family or work colleagues with the time, date and the link to your chosen platform. Allow enough time for them to download the app and create a log in, if necessary. Don't forget to share the link to your JustGiving page too!
- 5 Plan your quiz**
Now it's time for you to plan your questions. You can make up your own or use the quiz questions we've provided at the back of the pack. Our mix of questions ensures that all of your family and friends of any age can have a go and take part!
- 6 Get in touch**
Let us know about your quiz night and how much you've raised by tagging us on social media.

 @TheChildrensAirAmbulance
 @childrensairamb
 @childrensairamb

£24 could pay for a pair of children's ear defenders to protect little ears from our noisy rotors.

Hints and tips

- Ask your guests to bring a pad and pen to the event so that they can take note of their answers.
- Make sure your speakers and microphone work on your devices.
- Make sure everybody taking part has the right details and can access the platform you're using.
- Charity jokers – before you start, all teams are told that they have 10 jokers each. Throughout the quiz they can put their jokers against 10 of their answers and if they get that joker answer right, they earn double points... if they get their joker answer wrong they have to pay £1 into the fundraising pot. They're only allowed a limited amount of jokers through the whole quiz, so they have to use them wisely!
- Don't forget to have your quiz answer sheet with you.
- Remind your teams in between rounds that this quiz night is helping to provide lifesaving funds for the Children's Air Ambulance. Don't be shy to remind them about your JustGiving page, your friends and family will be proud to support where they can.

Round 1:

General knowledge

1. In which TV show do Cartman and Chef appear?
South Park
2. What is the cubed root of 64?
Four
3. Which snooker player was known as The Hurricane?
Alex Higgins

Jack
9. A cob is an adult male of which bird?
Swan
10. Which element - atomic number 15 - gets its name from the Greek for light bringing?
Phosphorus

Feeling inspired?

Visit our website to find out about more ways to support us.

Children's Air Ambulance is an inter-hospital transfer service flying critically ill babies and children from one hospital to another for specialist care.

With our ability to fly approximately four times faster than a land ambulance, we can minimise travel times and the risk for little patients.
