

Rocking rock crafts

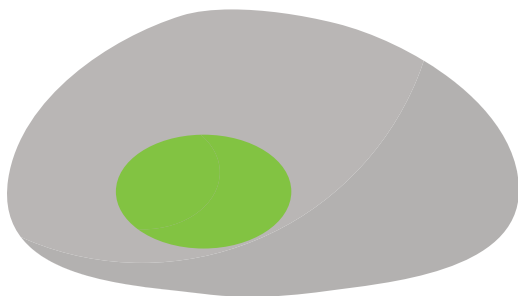

With a little imagination and some marker pens or paint, you can turn any rock or stone into a work of art.

Follow our step by step picture guide to make an awesome helicopter design. Once complete, spread the cheer in your community by starting a rock snake or by hiding them somewhere for others to find.

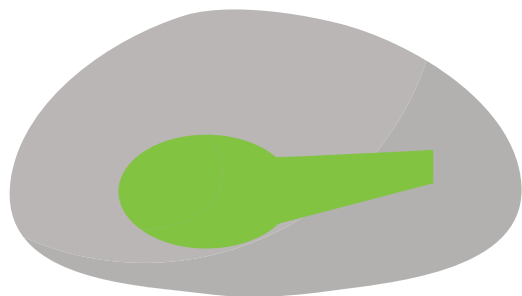

You will need

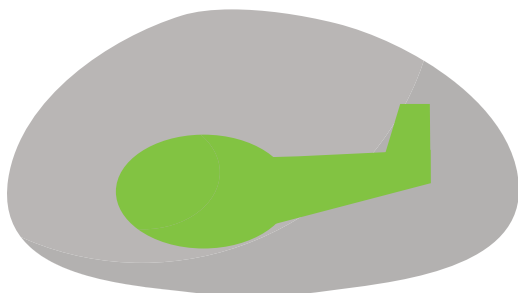

- Green Paint or marker
- Black Paint or marker
- Clear varnish

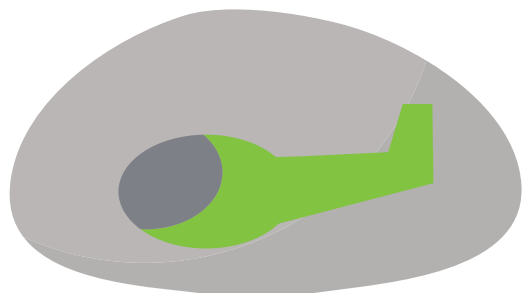

1. Paint a green oval

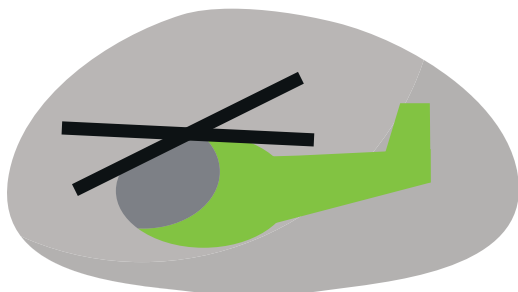

2. Next paint the helicopter's tail

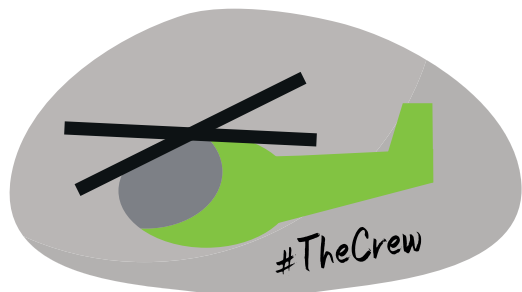

3. Add a smaller tail to the end

4. Once the green paint is dry, paint a grey oval to create the helicopter's windscreen

5. Once the grey paint has dried, paint on two diagonal lines using black paint for the blades.

6. Finally sign off with #TheCrew hashtag. Wait till everything is dry then seal with clear varnish and display with pride!

Share your designs with us and email them to
